WEB DESIGNER & DEVELOPER

Passionate and driven Web Designer and Developer. Born on May 21, 1998, actively seeking a Junior Web Developer/Designer position within a forward-thinking company. With a solid foundation in HTML, CSS (Tailwind), JavaScript, WordPress, WooCommerce, and Shopify, I bring a strong enthusiasm for UX/UI design, leveraging tools like Figma, Canva, and Photoshop.

I'm excited to put the skills and knowledge I've gained through both formal education and self-guided learning to work in a web development team. I want to be involved in creating innovative software solutions while continually building on my technical skills. I believe my dedication, technical abilities, and passion for programming will make me a strong asset to any development team.

KEY COMPETENCIES

Technical Proficiency
UX/UI Design
Problem-Solving

Adaptability
Project Management
Attention to Detail

Collaboration and Communication
Continuous Learning
Customer-Centric Approach

PROFESSIONAL EXPERIENCE

May 2023 - Present

KockaPlus d.o.o

Web Developer

- Designed and developed responsive, user-friendly websites, ensuring optimal performance across various devices and browsers.
- Leveraged WooCommerce API to automate and streamline tasks, significantly improving workflow efficiency.
- Developed Python scripts to automate repetitive tasks, enhancing productivity and reducing manual effort.
- Managed a B2B website for a wholesale optics company, creating two distinct profiles for each business: one with visible prices and a second with hidden prices and a disabled cart for presentation purposes.
- Oversaw the entire product data management process, including stock keeping units (SKU), ensuring accurate and up-to-date inventory records.
- Played a key role in biannual presentations, showcasing product improvements and new offerings to clients in the optics industry.

Freelance Experience

Jan 2022 - Present

UX/UI Designer

- Crafted engaging and intuitive designs using Figma, focusing on user experience and visual appeal.
- Redesigned websites to improve user interface and overall functionality, aligning with client goals and branding.
- Developed responsive and animated designs, ensuring a seamless user experience across various devices.
- Prepared design deliverables for developers, including detailed assets and creating brief documentation to guide implementation.
